Business Terms and Information

Please Read Carefully Before Ordering

TERMS:—

Remittance must accompany all orders, as prices are based on cash with order. Shipment by Parcel Post or Express at our discretion.

We pay postage on all orders of \$1.00 and over. On orders of less than \$1.00, add 15 cents for postage.

HOW TO REMIT:—

Make remittances by Post Office Money Order, Bank Draft, or Personal Check payable to Home Garden Co.

SUBSTITUTIONS:—

No substitutions will be made unless your order so requests.

GUARANTEE:—

All stock shipped guaranteed true to name, healthy and vigorous. Should any error occur in labeling, or otherwise, and any stock prove untrue, we will replace with true stock and you may keep the first stock shipped.

BANK REFERENCE:—

If you should care to do so, we invite you to refer to Baldwinsville State Bank, Baldwinsville, N. Y.

BEAUTIFUL IRISES

The Iris has been voted America's most popular garden flower. There are good reasons why it has been accorded this signal honor. First, it is extremely hardy and thrives over a wide territory. Then, it is easy to grow, gives quick results, and is admirably adapted to all types of decorative plantings. You will get a lot of pleasure from growing Irises.

Irises mark the boundaries of a well kept lawn

Why Irises

Of all the garden flowers, the Iris is the most popular. It has been so honored by the Garden Club of America. There are good reasons why.

First of all, Irises are extremely hardy. In various forms and types, they are found growing wild and under cultivation in all climates and in all parts of the world. Their varied species make them adaptable to almost any cultural condition.

Then, Irises are easy to grow. They are easy to plant, and they usually flower well the first season. With care they can be transplanted at any time—even when in full bloom.

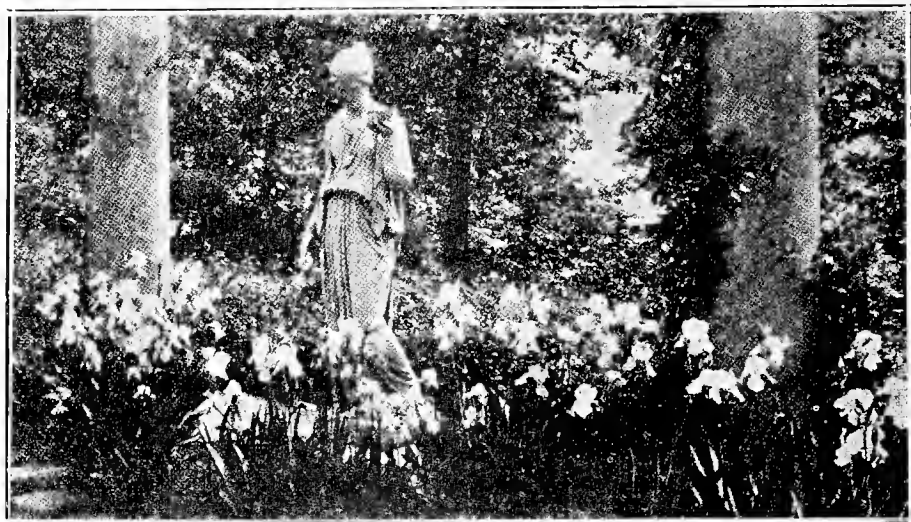

Irises just naturally lend themselves to garden planning. In borders or in beds, in rockeries or about the lawn, in broad masses or in tiny nooks, they are ornamental.

Irises afford a long flowering season. Beginning in April before the tulips reach their prime, they last through many weeks and lap well over into Peony-time.

But best of all, Irises are colorful. Their rich and velvety purples, their clean blues and yellows, and their delicate orchid-like lavenders and pinks are effective beyond compare. By their use, all the fairy colors of the heavens are available to "paint" a pleasing setting for the home.

HOW TO GROW IRISES

Most Irises are easy to grow. They will thrive in almost any kind of soil, even in a position where most other things will not do well, provided it is well drained and gets the sun. Contrary to the somewhat prevalent idea that Irises are, by nature, water-loving plants, most of them cannot be grown successfully in poorly drained soil, or where water stands about their roots any part of the year. Because they are so adaptable, they are often looked upon as something to fill in a difficult spot in the garden and, consequently, do not receive the cultivation they deserve. No plant more adequately repays for good and proper cultivation.

Irises add charm to the most carefully planned garden

TALL BEARDED IRISES

The following list of Bearded Irises includes most of the varieties we are able to supply for shipment this year. In it will be found most of the Irises of outstanding merit now in commerce, including many of the newer kinds.

VINGOLF. Creamy-bronze and violet, fine, 30 inches25
VIOLACEA GRANDIFLORA. Clear violet-blue, 3 ft.15
VIRGINIA MOORE. A bright chrome-yellow, 30 in.15
WALHALLA. Lavender-blue, very early, 30 inches10
WEDGEWOOD. Gloriously rich blue, you will like it25
W. F. CHRISTMAN. White and purple, showy10
WHITE KNIGHT. Chaste beautiful white, 30 inches15
WILD ROSE. Shade of the Prairie rose, 33 inches25
WINDHAM. Pink, veined magenta, lovely, 30 inches15
W. J. FRYER. Olive-yellow and purple, ruffled, 33 in.10
WOODLAND. Mauve to light violet, fine, 4 ft.25
WYOMISSING. Creamy-white to rose, early, 30 inches15
YELLOW RAIL. Lemon-yellow, curious growth25

YOLANDE. Deep blue and purple, very large, 40 in.25
ZEPHYR. Deep lavender, attractive15
ZINGARA. Chrome yellow veined red, odd25
ZOUAVE. White, suffused lilac, early, 30 inches10
ZUA. A crinkled dwarf, white tinted lilac, 16 inches25
ZULU. Aniline-blue to velvety purple, fine, 3 ft.50
ZWANENBURG. Chamois to olive, curious, early, 18 in.25

A Tall Growing Variety of Siberian Iris

IRIS SIBIRICA

The Siberian Irises comprise one of the most valuable Iris groups, and one that merits wider recognition in our plantings. When their requirements are understood, they are the easiest of all the Irises to grow. Their varied habits of growth and their colorful display of bloom add much to the possibilities of garden planning. Their long, slender stems and the enduring substance of the flowers make them the most desirable Irises for cutting and for interior decoration.

The Sibiricas are naturally adapted to landscape and decorative plantings. Their graceful, grass-like foliage is vigorous and retains its beauty throughout the entire season, while their profusion of bloom affords brilliant and effective coloring. They will thrive in the cultivated border, or in any strong, rich soil, and are thoroughly at home in naturalized plantings or when used to fill in the odd corners. They are effective about the pool, surrounding the bird bath, and when worked in about the rockery; and they are beautiful in border planting along the drive, or when massed along the watersides.

BOB WHITE. A lovely white, heavy texture, 30 in.15
BUTTERFLY. Beautiful light blue, 36 inches15
EMPEROR. Splendid rich deep violet-blue, 42 inches15
FLORRIE RIDLER. Blue, center lighter, very dark15
KINGFISHER BLUE. Bright sky-blue, 5 ft. tall25
ORIENTALIS SANGUINEA. Free flowering, light blue15
PAPILLION. A glorious light blue, 42 inches15
PEGGY PERRY. Beautiful blue violet, sturdy15
PERRY'S BLUE. Wonderful sky-blue, popular, 48 in.15
PIGMY. Dark violet dwarf, desirable, 18 inches15
RED EMPEROR. Rich reddish color25
SKYLARK. Clear light blue15
SNOW QUEEN. White flowers with yellow blotch, 3 ft.15
SUNNYBROOK. Medium blue, exquisite shade, 2 ft.15
TRUE BLUE. A fine blue, free flowering, 30 inches15
WHITE DOVE. A fine white, 42 inches15

BEARDLESS IRISES

Species and Miscellaneous Varieties

In this group we offer several species and hybrid varieties that are very desirable. Many of them are suitable for planting in moist places and combine well with the other beardless Irises of the Sibirica group in decorative plantings. All will thrive in the well tilled border, and all should have advantage of full sun.

BEARDLESS IRIS

Pseudacorus

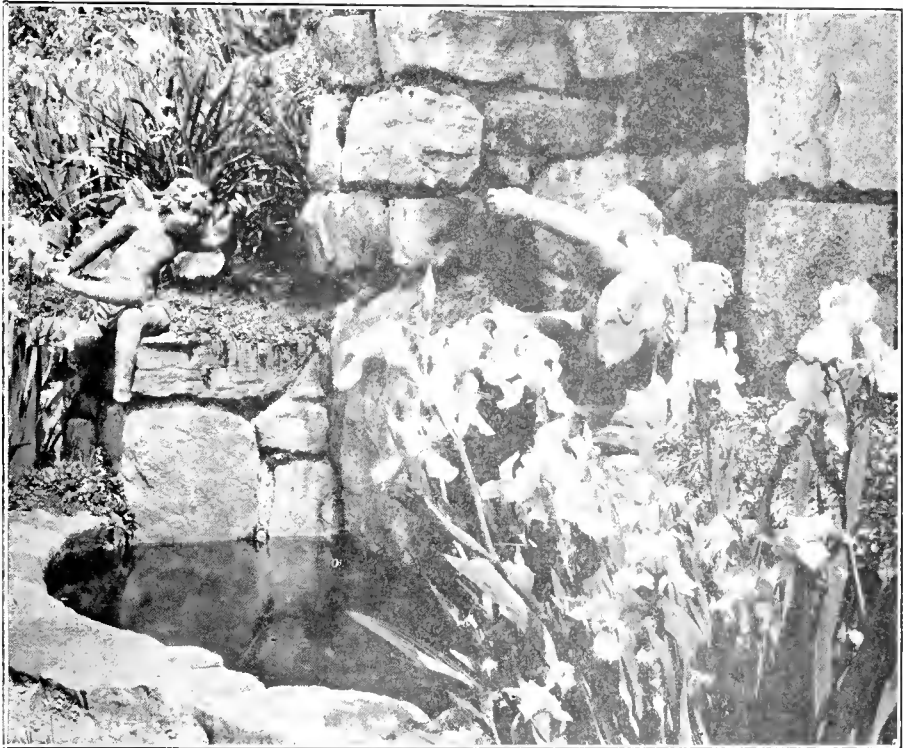

DOROTHEA K. WILLIAMSON.	Blue purple, 36 inches25
ENSATA.	Small, pale gray-blue flowers, 18 inches25
FULVALA.	Rich, reddish terra-cotta, 28 inches25
MONSPUR.	Large pale blue flowers, 4 ft.35
MRS. TAIT.	Clear porcelaine-blue, a beauty, 30 inches25
OCHROLUCEA.	A nobel white. yellow throat, 6 ft.50
PSEUDACORUS.	Bright golden yellow20
SHELFORD GIANT.	Yellow, 6 ft. tall, late50
TECTORUM (Species).	Roof Iris. A lovely Chinese species that is held in high esteem by the Chinese people, and is frequently seen growing on the roofs of their houses. The flowers are flat in form, pale blue with beautiful reticulations and a conspicuously fringed white crest. 12 inches.	50 cents each

DWARF BEARDED IRISES

Here are the dwarf growing forms that flower at the very beginning of the season. They are valuable garden plants because they afford color just when blooms are most welcome. On account of their miniature growth, they are in increased demand for rockery plantings and border use. They are generally very free flowering on short stems, or no stems at all, and the blooms are set low in the foliage. All Dwarf varieties are resistant to drouth and thrive in dry, well drained locations.

ATROVIOLACEA. A very early purple, 4 inches15
BLACK MIDGET. Deep, blackish purple, 6 inches25
DIE FEE. Two shades of violet blue, 6 inches15
JOSEPHINE. White, tinted yellow, 6 inches15
LOBELIA. Pansy-violet, bordered blue15
MAROCAIN. Dark violet, very free bloomer, 9 inches25
ORANGE QUEEN. Clear, deep yellow, 7 inches25
SOCRATES. Claret red, pleasing shade25
THE BRIDE. Nearly pure white, good, 7 inches15

Irises Are Effective Around the Pool

PEONIES ARE EASY TO GROW

Peonies are easy to grow and will do well in almost any location where they have any reasonable chance. They will thrive with less care and attention than most perennials, yet they are worthy of special care and will repay for special cultivation. Once planted, they will live for years, increasing in beauty and value from season to season. Because they are slow to become established and resent being disturbed, care should be taken that new plantings be suitably located and the planting properly done.

WHEN TO PLANT. Growers begin fall shipping after the eyes are matured, usually about September 15, and planting may successfully be done any time before the ground freezes up for winter.

WHERE TO PLANT. Peonies should be planted in fertile, well-drained soil, and where they will get the full sun at least half the day. They will not do well in poorly drained ground, or where water stands about their roots during any part of the year; and they will not bloom well, if close under trees or in full shade.

Many of the originators names are abbreviated in the following lists: Crousse (Cr), Lemoine (Lem), Kelway (Kel), Hollis (Hol), Richardson (Rich), Guerin (Gu), Calot (Cal), Goos & Koenemann (G. & K.), Rosenfield (Ros), Gombault (Gom), Verdier (Ver), Vilmorin (Vil), Franklin (Fra), Dessert (Des), Thurlow (Thur), Shaylor (Shay), Riviere (Riv).

Rating of Varieties

The figures following the varieties give the ratings based on 100 per cent and were taken by members of both Peony and Iris Societies.

DOUBLE FLOWERED PEONIES

ADELAIDE E. HOLLIS (Hol)	7.7	Uniform lilac-white. Late mid-season. Large, high crown type flowers, strong stems	.75
ADOLPHE ROUSSEAU (Des)	8.5	Rich dark red. Tall, vigorous, early. One of the best early reds	.75
AKSARBEN (Ros)	7.2	Brilliant dark crimson. Midseason	\$1.00
ALBERT CROUSSE (Cr)	8.6	Soft shell-pink. Fragrant, late	.75
ALEX D. VORIES (Vories)		American beauty red. A very large, loose, semi-double	\$1.50
ALICE BALFOUR (Kel)		Delicate rose pink. Midseason	\$2.00
ALICE HARDING (Lem)	9.5	Beautiful variety from France. Creamy-white, delicately tinted flesh pink. Strong stems. Midseason	\$3.00
ALSACE-LORRAINE (Lem)	8.8	Rich creamy-white, tinted brownish-yellow. Midseason. Semi-rose type flower with long petals	.75
A. M. SLOCUM (Fra)	9.0	Large cream-white. Golden yellow stamens. Petals occasionally edged crimson	\$1.00

WILTON LOCKWOOD (Shay) 8.8 A very tall variety of soft rose-pink, marked red. Midseason. Strong stems, often 5 ft. high\$1.00
WINNIFRED DOMME (Brand) 8.3 One of the brightest and clearest red varieties. Early. Bomb type. Plant rather dwarf75
WINNIKENNI (Thur) Rose pink. Very late. Free bloomer\$1.00

SINGLE PEONIES

These single peonies, or those having but one row of guard petals surrounding a central cushion of yellow stamens, are a distinct type of flower which deserves a place in every peony planting, however small. Each season their desirability both for landscape effect and for cut blooms is more fully recognized, and the demand for the finer kinds has exceeded the supply.

ALBIFLORA (The Bride) 8.2 Large, single white. Golden stamens. Very early. Very popular. Very free bloomer	...\$1.00
AREOS Delicate pink, large center of gold stamens. Very early. A dainty variety. One of the first to bloom\$1.00

ball of golden stamens. Very large flowers	\$1.00
VERDUN (Des) Very large single flower with broad rounded	
petals of a very bright crimson-red, with striking	
metallic reflex	\$5.00

JAPANESE PEONIES

The so-called Japanese peonies are really a type of flower occurring in the process of development from the single flower to the full double bloom which have the same wide guard petals as the singles but in which the central stamens and anthers have become transformed into narrow, thick petaloids of various colors, or into narrow petals tipped with vestiges of the yellow anthers without pollen. Because this type of bloom was favored by Japanese gardeners, such peonies have come to be known as Japanese Peonies. While many of the finest "Japanese" varieties have been imported to this country from Japan, equally good Japanese type peonies have been selected from the seed beds of growers in the United States, France and England.

Japanese peonies in general are strong growers, they usually propagate slowly; and the increased demand for them has made many of the finer varieties very scarce.

ABBIE (Lewis) Deep rose pink, with ruffled center. Medium	
height. Free bloomer	\$1.00
AKALU (Japan) 8.1 Bright carmine-red. Gold staminodes,	
faced rose-red. Midseason	\$1.00

OFFI. RUBRA PLENA, red50
OFFI. ROSEA PLENA, pink50
OFFI. MUTABILIS, pink50
TENUIFOLIA LATIFOLIA, crimson	\$1.00

IRISES

All roots shipped will be of standard size as recognized by the Grower's Association—selected single rhizomes of size and development obtainable at the time the order is filled. It should be remembered that different Iris varieties vary much in the size of their rhizomes. We always send good average roots of the varieties ordered. The rhizomes dug for early shipments are necessarily smaller than those of the same varieties shipped later in the season.

PEONIES—SIZE OF DIVISIONS

Prices quoted for strong 3 to 5 eye divisions, with a well balanced root system. Healthy and true to name.

GUARANTEE

All plants shipped are guaranteed to be true to name, vigorous and healthy when received. Should any error occur in labeling, or otherwise, and any stock shipped eventually prove untrue, we will replace it with true stock, and you may keep the plants first sent.

THE
AGE OF COLOR.
